**Level above which ground is expected to be frozen/snow is expected to settle.*

Met Office Aberdeen Meteorologist's View
Even with just a light breeze over higher ridges and summits, it will still feel chilly with temperatures close to or below freezing.

Forecast for Saturday 16 Oct 2021
Weather: Dry, bright start with sunny spells and a frost in the glens. Then becoming cloudy later in the morning with patchy light rain in the afternoon, becoming more persistent and heavier by evening.

Maximum wind: South or southwesterly winds strengthening on the tops during the day, average speeds of 15mph at first increasing 30 gusts 45mph in the afternoon.

Chance of cloud free mountain/hill tops above 800m: 80% at first, reducing to 40% by afternoon and little chance by evening.

Visibility: Very good with some patches of cloud on the tops at first, mostly hills near to West Coast. Clouds will become more extensive during the morning with bases lowering during the afternoon to about 600m. Also becoming misty during the afternoon with poor visibility as more persistent rain sets in.

Temperature: **Glens:** Minus 1 Celsius rising later in the day to 13 Celsius.
At 800m: Zero Celsius rising to plus 5 Celsius during the afternoon.
Freezing level: 800m at first, lifting above the summits during the day.
